Run All Tests At Once  
FLASH Test  
LCD Test  
Voice Test  
Key Test  
RTC Test
- 29 TROUBLESHOOTING**

# 1 • GETTING STARTED

## Viewing the User Guide in the Internet

The User Guide is available in the package when you purchase the terminal. The User Guide is also available online at [fingertec.com](http://fingertec.com) and [user.fingertec.com](http://user.fingertec.com). Choose the language that you prefer for your online User Guide.

## Terminal Included Accessories

### A Packet of Bolts

Use the screws to hold the back plate of the terminal against a wall.

### RFID Cards (5 pieces) / HID/MIFARE Cards (1 piece)

For card enrollment and verification.

### USB Extension

To connect to the USB port of a computer for uploading and downloading of data.

### Screwdriver

Use the screwdriver to open the back plate of the terminal and to install the back plate against a wall.

### TCP/IP Connector

Connecting the network cable from a PC or Network switch to a TCP/IP connector at the terminal.

### TCP/IP Cable

Connecting terminal for Ethernet connection.

### Door Accessories Cable

Cables for 12V door lock, push button, 12V alarm, door sensor and 12V door bell, for door access.

### RS232/RS485/Wiegand Output Cable

For serial cable connection and Wiegand Output connection.

### Power Supply Cable

To connect the terminal to a 12V power supply.

## Included Printed Materials

- FingerTec Comprehensive DVD
- Quick Start Guide
- User Enrollment Template Form
- Warranty Card

## Activating Terminal

Every FingerTec access control model comes bundled with a unique license key. To start using the terminal with Ingress, you must connect the terminal to Ingress and perform online activation. Ingress reads the serial number of your terminal and sends it for verification at the FingerTec server via Internet.

In case you do not have an Internet connection, you would need to do offline activation. Please send the serial number and models of your terminals to your local resellers or [support@fingertec.com](mailto:support@fingertec.com) to request for a product key and activation key.

## Registering Terminal

Make sure that you register your terminal's warranty with us at [fingertec.com/ver2/english/e\\_warranty.htm](http://fingertec.com/ver2/english/e_warranty.htm).

## 2 • BASICS

### Introduction to Products

The terminal for time attendance and door access system supports RFID card ID, 5-digit password or combination of both. It works with security alarm system to alert users in cases of break in and when the duress function in the terminal is used. The terminal can integrate with a fire alarm system to unlock all doors when the fire alarm is triggered.

The terminal communicates with a computer via TCP/IP and it allows data transfer to be done with USB flash disk to eliminate extra wiring.

The terminal complies with international standard of CE & FCC, our testament to safety & quality.

### Overview

ITEM	FUNCTION
LCD Screen	Displaying status of terminal, day, date and time.
LED Display	<b>Green LED</b> – The terminal is working fine and it is in standby mode. <b>Red LED</b> – There is an error at the terminal that requires checking. For first time use, the terminals need to be charged fully to avoid having the red light blinking.
Keypad	To input instructions into the terminal and to allow configuration.
RFID Card Induction Area	Area that reads RFID cards.
USB Port	To upload/download users information, password and transaction logs via USB flash disk.
Speaker	For terminal voice emission.
Reset Button	To restart the terminal as and when required.

## Power On/Off Button

There is no power button available. Restart the device using the reset button shown on the bottom of the terminal.

## Keypad

You can insert inputs into the terminals through the keypad. It contains numbers from 0-9, an OK button, an ESC/Cancel button, a Scroll up/down button, a doorbell button and a Menu button.

## Battery

The terminals operate using power supply from a standard power outlet.

**Mini UPS:** Mini UPS 12V can also be used to provide power supply to turn on the terminals. Refer to [accessory.fingertec.com](http://accessory.fingertec.com) for more information about accessories.

## Date/Time

The terminals displays the date and time at the home screen. Choose the date and time format based on your preference. Press Menu > Options > Systems Options > Date/Time > set your time and save.

**To change the date format:** Press Menu > Options > Systems Options > Fmt > Determine the date format based on your preference.

## Voice Control

Voice Control lets you control the level of volume emitted by the terminal.

### TURN ON/OFF

The system lets you turn on/off the voice based on your preference. Press Menu > Options > System Option > Adv Option > Voice > Y/N.

### ADJUST VOLUME

The default volume of the terminal's voice is 67. The volume can go as high as 100 and as low as 0. To sustain the performance of the speaker, it's recommended to stay at range 60-70. To adjust the volume Press Menu > Options > System Option > Adv Option > Adj VOL (%) > adjust accordingly .

## Security Features

Security features help protect the information in the terminal from being accessed by unauthorized individuals.

### **ADMIN AFFIRM**

Register an administrator into the system by enrolling or a password to a user ID. Press Menu > User Manage > Enroll Admin > Choose enrollment method > Perform enrolment and Save. After enrolling an administrator, the main menu can only be accessed by the administrator.

### **TAMPER SWITCH**

The terminals come with a tamper switch located at the rear of the terminals. During installation, the tamper switch is compressed against the back plate. Any attempt to dismantle the terminal will trigger an alarm and a “System Broken” message will be displayed on the panel.

## Cleaning Terminal

### **CLEANING THE BODY**

Use a dry cloth to clean the terminal’s body. Do not use any liquids, household cleaners, aerosol spray, solvents, alcohol, ammonia and abrasive solutions to clean the body of the terminal because it could damage it.

## Restarting and Resetting Terminal

If a feature isn’t functioning as it should, try restarting or resetting the terminals

### **RESTARTING THE TERMINAL**

Push the On/Off button or “reset button” on the terminal to restart the terminal. If you can’t restart the terminal, or if the problem persists, you might want to reset.

### **RESETTING THE TERMINAL**

Press Menu > Option > System Option > Adv Opt > Reset terminal. Resetting of the terminal will cause all your settings to return to its original factory settings. Make sure that you have backed up all data before you proceed.

## 3 • CONNECTION – SYNCING TERMINALS

### Installations

FingerTec terminals offer several connections for power and communications. Installations of FingerTec time attendance terminals are simple.

#### MOUNT ON WALL

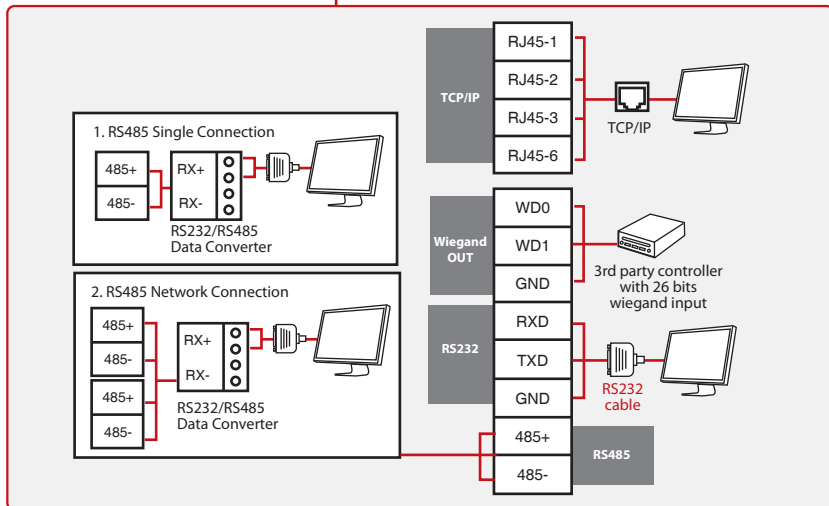

Attached the back plate on the wall securely and attach the terminal to the back plate when mounting it on the wall.

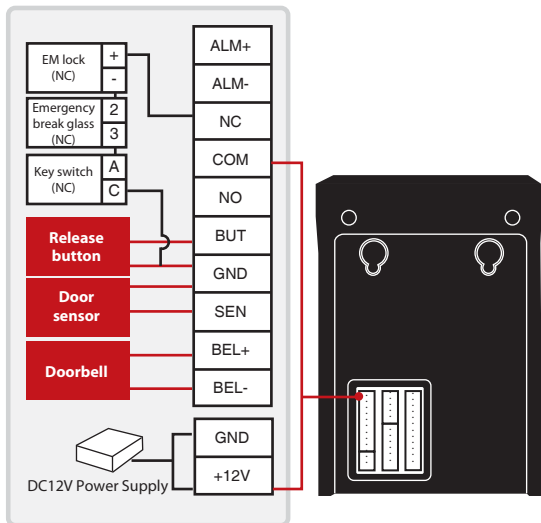

# Communications

Connection points for power and communication are available on top of the terminals. Refer to the following diagrams for the terminals you require.

For NC (normally closed) door lock system

For NO (normally open) door lock system

**NOTE** Please refer to AdapTec AC Installer Manual if you are using AdapTec AC.

**USB PORT**

Linking with USB flash disk for remote data transfer.

**TCP/IP PORT**

Connect with CAT 5 cable for LAN connection, one end to this port and another end to the computer's TCP/IP Port.

**TCP/IP for Single Connection** – Linking the terminal to a single computer using TCP/IP requires Ethernet 10/100Base-T Crossover Cable. The cable can be used to cascade hubs or to connect Ethernet stations back-to-back without a hub. It works with both 10Base-T and 100Base-TX

### JOINT 1 PIN

### JOINT 2 PIN

**TCP/IP for Network Connection** – Linking the terminals to multiple computers using TCP/IP requires Ethernet 10/100Base-T Straight Thru Cable or “whips”. The cable works with both 10 Base-T and 100Base-TX, connecting a network interface card to a hub or network outlet.

CONNECTOR PIN	CABLE COLOR	CONNECTOR
TX+	1 White/Orange	TX+
TX-	2 Orange	TX-
RX+	3 White/Green	RX+
	4 Blue	
	5 White/Blue	
RX-	6 Green	RX-
	7 White/Brown	
	8 Brown	

### POWER SUPPLY PORT

Insert the Power Adapter point to this port for power.

### RS232/RS485/WIEGAND CONNECTION PORT

**RS232** – Connection to a computer using RS232 cable.

**RS485 Single Connection** - Connection to a single computer using RS485 wire.

**RS485 Network Connection** - Connection to multiple computers using Daisy Chain connection.

**Wiegand Output** – Connecting with third party connector or terminal(s).

### ACCESS CONTROL PORT

Linking the terminal to door lock system.

### BELL PORT

Linking the terminal to doorbell.

**NOTE**

Link all cables to the correct connection point(s) before attempting to connect the terminals to software.

## Ingress Online Activation

Ingress is a genuine software by FingerTec. Every FingerTec access control model comes bundled with a unique license key. To start using the terminal with Ingress, you must connect the terminal to Ingress and perform online activation. Ingress reads the serial number of your terminal and sends it for verification at the FingerTec server via Internet.

In case you do not have an Internet connection, you would need to do offline activation. Please send the serial number and models of your terminals to your local resellers or [support@fingertec.com](mailto:support@fingertec.com) to request for a product key and activation key.

## Installation and Setup of Ingress

Install Ingress in a PC that fulfills Ingress’ minimum requirements. Refer to <http://www.fingertec.com/customer/download/postsales/SUM-Ingress-E.pdf> for the Ingress user guide online. Setup Wizard will require you to do online activation before connection establish between Ingress and terminals.

# Connecting the Terminals to Ingress

## DETERMINING TERMINAL NUMBER

Identify the number of your terminals to differentiate them between one another. Ingress can connect up to 999 units of terminal. Press Menu > Options > Comm Opt > Dev Num > Select the number.

## USING TCP/IP

IP address is important, as it is a unique address of the terminal in LAN. Without the IP address, locating the specific terminal is not possible. **To input the IP address of the terminal:** Press Menu > Options > Comm Opt > IP Addr > Key in IP address.

## USING TCP/IP

It is important to setup the Ethernet to connect the terminals using TCP/IP connection. **Setting up the Ethernet is done by enabling the Ethernet function:** Press Menu > Options > Comm Opt > Ethernet > Yes.

Turn off the terminal after you have set the Ethernet setting to Yes. Now, plug-in the network plug to the Ethernet interface and turn the power on.

**Determining the Netmask, Gateway and NetSpeed:** For TCP/IP connection, please configure the netmask, gateway and netspeed for the terminal.

Press Menu > Options > Comm Opt > NetMask > Insert the numbers.

Press Menu > Options > Comm Opt > Gateway > Insert the numbers.

Press Menu > Options > Comm Opt > NetSpeed > Choose the speed of your Ethernet connection.

## USING RS232 CONNECTION

For connection via RS232, baudrate is the determinant of communication speed between the terminal and the software. The higher the baudrate, the faster the speed is.

**To turn on RS232 connection and set the baudrate:** Press Menu > Options > Comm Opt > RS232 > Change the RS232 connection to Y.

**To change baudrate:** Press Menu > Options > Comm Opt > Baudrate > Change the Baudrate accordingly.

## USING RS485 CONNECTION

For connection via RS485, baudrate is also the determinant of communication speed between the terminal and the software but the speed must be according to the speed of the converter. Check your converter for the speed.

**To turn on RS485 connection and set the baudrate:** Press Menu > Options > Comm Opt > RS232 > Change the RS485 connection to Y.

**To change baudrate:** Press Menu > Options > Comm Opt > Baudrate > Change the Baudrate accordingly.

## Using USB to Download/Upload Data

A USB flash disk is useful in cases where the terminal is installed far from a PC or there is a connection problem. To determine the type of USB flash disks compatible with the terminal, please refer to this link at [fingertec.com/newsletter/HL\\_74.html](http://fingertec.com/newsletter/HL_74.html) using USB

Press Menu > PenDrive Mgmt > Choose the operation that you want to carry out via USB flash disk.

## Communication Key

Since the software is controlled by an activation code and a product key, set the COMM key to zero. Press Menu > Options > Comm Opt > COMM Key > Set to 0.

### Enrolling User

The terminals can enroll passwords and card information. This chapter covers all possible user enrollments in the terminals.

**Caution:** Enrollment of supervisor or administrator is important to ensure the terminals data safety. Prior to enrolling a new user, a supervisor has to be enrolled first by using any of the methods mentioned below. Select Enroll Admin > Choose the Privilege Level either Supervisor or Administrator to proceed.

#### CARD ENROLLMENT

The default card for the terminal is the RFID card. MiFare and HID card systems are available upon request.

**Enrolling card:** Press Menu > User Manage > Enroll User > Reg RFID > New Enroll? > OK > Key in User ID (PIN) > Wave the card at the scanning area until the screen displays the Card ID > (OK) Save

#### PASSWORD ENROLLMENT

The terminals offer password verification and the maximum length of password is 5 digit.

**Enrolling password:** Press Menu > User Manage > Enroll User > Enroll Pwd > New Enroll? > OK > Key in User ID (PIN) > OK > Input your password > LCD showing the ID with minus -P to indicate that the user ID is using password > OK (Save)

**Changing password:** Press Menu > User Manage > Enroll User > Enroll Pwd > ESC > Input User ID > OK > Change your password > LCD showing the ID with minus -P to indicate that the user ID is using password > OK (Save)

#### CARD AND PASSWORD ENROLLMENT

The terminals offer a combination of card and password enrollment for better security.

**Enrolling card and password:** Press Menu > User Manage > Enroll User > Card & Pwd > New Enroll? > OK > Key in User ID (PIN) > OK. Wave the card at the scanning area until the screen displays the card ID > OK (Save) > Input your password and confirm the password one more time > LCD is showing the ID with minus -OP to indicate that the user ID is using a combination of card and password > OK (Save)

#### PASSWORD VERIFICATION

Password is an option for those who prefer not to use other verification methods. To verify via password, insert User ID > OK > insert password and press OK.

#### CARD VERIFICATION

Place the card on the card scanning area and the terminal will read and verify the card.

# Types of Verification Methods

The terminals offer various verification methods which include User ID (PIN), Password (PW), and RFID (RF). You can configure the terminal to offer multiverification methods. Press Menu > Options > Access Options > Group VerType > Select the Group > OK > Select the time > OK > Down arrow and select Verification Type > OK

The terminals support the following combinations of verification:

VERIFICATION TYPE	DESCRIPTION
PIN	User ID only
PW	Password only
RF	RFID Card only
PW/RF	Password or RFID Card
PW & RF	Password and RFID Card

Go to **Chapter 8: Access Options** to learn more about Grouping and Group Definition.

## Adding User Information

User information can be added into FingerTec terminals through the software software. After the information is updated, sync software with the terminal to display the information.

## Deleting User

Only an administrator can perform user deletion at the terminal. To delete certain user(s), press Menu > User Manage > Delete > Input User ID > The terminal will tell you the verification method enrolled by the user ID > OK > Prompting you to Delete User > Press OK > Confirmation is required > OK as Yes and Esc as No

## Access Level/Privilege

The terminal offers various types of access level or privilege.

PRIVILEGE	USER ROLES
Normal User	Only use the terminal to verify your identity. You cannot access into the Menu and make changes on settings and system
Enroller	You are allowed to access into the menu to enroll user only.
Administrator	You are allowed to access into the menu to enroll users only and edit simple settings and system excluding access options and advanced options
Supervisor	You are allowed to access into the menu to enroll users and edit settings and system

### General Settings

#### ADJUSTING DATE/TIME

The function of the terminal is to record time attendance and door access activities of employees. Precision in time and date cannot be compromised for the system to work efficiently. Adjust Date/Time according to your time zone. Press Menu > Options > System Opt > Date/Time > Select Value > OK

#### DATE FORMAT

Date format differs based on countries for example in Malaysia the format used is, date-month-year whereas in America, month comes first. Choose your date format according to your preference. The default format is dd-mm-yy. Press Menu > Options > System Opt > Fmt > Select Format > OK

#### SYSTEM LANGUAGE

The terminal offers various languages to match your local requirements. Maximum of 3 language packs are available in one terminal at a time and it's set according to your request during purchase. Default language is English. Press Menu > Options > System Opt > Language > Choose your language > OK

#### VOICE

The terminal has certain voice commands to guide users during enrolment and to notify users during the identity verification process. Press Menu > Options > System Opt > Adv Option > Voice > Y/N

#### VOLUME (%)

Voice Control lets you control the level of volume emitted by the terminal.

**Adjust Volume:** Default volume of the terminal's voice is 65. The volume can go as high as 100 and as low as 0. To sustain the performance of speaker in the terminal it's recommended to stay at range 60-70. To adjust the volume Press Menu > Options > System Opt > Adv Option > Adj VOL (%) > Set your number > OK.

#### USER INTERFACE STYLE

The terminal offers different user interface styles. Select your style based on your preference. Press Menu > Options > UI Style > Select your style > OK

#### BUTTON BEEP

Press Menu > Options > System opt > Adv Option > Button Beep > Y/N

## DEFINING WORK CODES

The fingerprint terminal provides a work code feature which allow users to key in predefined numbers after verification. The work code numbers are predefined in software. The following table is showing examples of work codes.

Reasons	Work code
Check In	00
Check Out	01
OT start	04
Done	05
Sick Leave	10
Half-day Leave	12
Emergency Leave	11
Meeting Client	20
Outstation	21

*Workcode Mode 1: Verification followed by work code*

*Workcode Mode 2: Work code followed by verification*

*To disable: Select No*

Press Menu > Options > System Opt > Adv Option > Work Code > OK > Select Preference > OK

## Update Firmware

FingerTec offer updates for the terminals regularly through software in a PC. Always consult your local reseller before you update firmware of the terminal or alternatively you can contact us at [support@fingertec.com](mailto:support@fingertec.com). Save the latest firmware in a USB flash disk before attempting this operation. Press Menu > Options > System Opt > Adv Option > Upd Firmware > OK > Plug Pen Drive? > Insert the USB Flash Disk into the slot > OK

## System Information

The terminals keep information of the system and this information is available for viewing by administrators.

### NUMBER OF USERS IN THE TERMINAL (USER COUNT)

Every model of the terminal has a different user capacity depending on the number of templates a user has in a terminal. **To find out how many users are enrolled in a terminal:** Press Menu > Sys Info > User Cnt > View the number

## QUANTITY OF ATTENDANCE LOGS SAVED IN THE TERMINAL (ATT LOG)

Once verification is completed, an attendance log will be stored in the terminal as a record. A terminal can contain up to 120,000 logs depending on the models. Press Menu > Sys Info > AttLogs > View the number

## NUMBER OF ADMINISTRATORS REGISTERED IN THE TERMINAL (ADMIN COUNT)

A company can enroll several administrators to manage the system. This function enables the company to check the number of administrator present for a particular terminal. Press Menu > Sys Info > Admin Cnt > View the number

## TRANSACTIONS DONE BY ADMINS IN THE TERMINAL (S LOGS)

Supervisors can trace the transactions and operations done by the Administrator in the terminal (Eg. Enrollment, Delete User, etc.). To view the transactions done by an administrator, Press Menu > Sys Info > S Logs > View S Logs.

## FREE SPACE INFORMATION (FREE SPACE)

Find out the information about availability of space in your terminal through this function. Press Menu > Sys Info > Free Space > View the info Information available includes fingerprint count, att log and S logs.

## DEVICE INFORMATION (DEV INFO)

Find out the information about your terminal through this function. Press Menu > Sys Info > Dev Info > View the info

*Information available includes:*

**AttLog (10k):** Shows the number of attendance logs that can be stored in the terminal, for example for AttLog (10k) 12 means  $10,000 \times 12 = 120,000$

**S Logs:** Shows the transactions carried out by Administrator in the terminal.

**Manufactured Time (Manu Time):** The date and time when the terminal was produced is displayed when you press Manu Time

**Serial Number of the Terminal (Serial Num):** The serial number of the terminal is important to activate the software and to liaise with FingerTec Worldwide in support issues. The Serial number is pasted on the back of the terminal but in case the sticker is damaged, this is where you can retrieve the serial number.

**Manufacturer:** Get the name of the manufacturer of the terminal here.

**Device Name:** All models have different names. If you don't know the name of the terminal that you are having, get it here.

**Firmware Version:** Support sometimes require a firmware version to resolve some support issues. The version and date of the version is released is provided here. For example: Ver 6.20 Aug 19 2009

**View MAC:** This feature is a security feature of the products. Linking Software to the terminal requires the correct MAC address. Without availability of MAC address, the software will not be activated correctly. All products are supplied with the correct MAC address to ease communication. This is also to hinder people from using the software with a different hardware brand. An example of a MAC address is 00:0A:5D F1 BE 57.  
Menu > Sys Info > Dev Info > View MAC

**MCU Version:** An MCU is the Main Controller Unit for the terminals. Version of the MCU determines the features and functions the terminal carries. **To check the MCU Version:**  
Menu > Sys Info > Dev Info > MCU Version

## Log Information (Log Opt)

A terminal can only retain certain amount of information before the terminal becomes full and stops accepting anymore data . To maintain the performance of a terminal, you can set an alarm to alert you when the data reaches a certain warning level.

### **ALARM SUPERLOG**

To instruct terminal to alert user if the transaction storage for administrator login is less than as configured. Default value is 99.

### **ALARM ATTLOG**

To instruct terminal to alert user if the transaction storage is less than as configured. Default value is 99

### **RECHECK MIN**

To instruct terminal to update clocking times of all users in a time interval. Default is 10 mins.

## 6 • DATA

Every time an enrollment is performed or a verification is done, a transaction log is created and stored inside the terminal. The data contains created terminal ID, date, time, userID and transaction activity. For example, 01050210090000000000010000:

These logs need to be managed to maintain the effectiveness of the terminal. It is recommended to do the housekeeping of data from the software but there are 5 functions available in Data icon to enable you to manage data in the terminals

DESCRIPTION	CODE
Terminal ID	01
Date (ddmmyy)	050210
Time (hhmm)	0900
User ID	000000001
Transaction Code	00
Terminal Activity	00

### Deleting Transaction Logs

**Delete Attendance Logs:** The fingerprint terminal stores every transaction logs of its user. Once a user is enrolled and verified, the logs will be kept in the terminal. Sometimes housekeeping needs to be done to sustain the terminal's performance. Please be certain before performing this operation because once the OK button is pressed, all attendance logs will be lost. Press Menu > Options > System Opt > Adv Option > Del Attlogs > OK > Delete? OK

### Deleting All Data

**Clear All Data:** The fingerprint terminal contains all user data including User ID, verification methods, fingerprint templates, logs, etc. This operation allows deletion of all data in the terminal. Please be certain before performing this operation because once the OK button is pressed, all data will be lost. Press Menu > Options > System Opt > Adv Option > Clear All Data > OK > Delete? OK

### Managing User Privileges

**Clear Admin Privilege:** To access system menu, it is recommended to enroll administrator to the system. Once administrator is enrolled, every time someone presses the Menu button, Admin Affirm message will be displayed. Clear Admin Privilege operation allows the current administrator to clear all his/her data to make way for the new administrator's data. Once the operation is completed, system menu is accessible by all users. Press Menu > Options > System Opt > Adv Option > Clr Admin Pri > OK > Continue? > OK

### Resetting to Factory Settings

**Reset Option:** This feature is to restore all settings in the terminal to return to the original factory settings. You have to be certain before conducting this operation because once the OK button is pressed the terminal will be reset automatically. Press Menu > Options > System Opt > Adv Option > Reset Opts > OK. Please redo all the settings to suit to your company's requirements. Press Menu > Data icon > Restore to Factory Settings > Confirmation is required (Yes/No)

## 7 • USB

### Understanding the Need for USB Flash Disk

Communication between the terminal and a PC is very important to upload and download transaction data for time attendance and door access reports. The terminal offers a few communication options such as LAN and serial cable connections but sometimes there are scenarios that require USB (Universal Serial Bus) connectivity. USB can connect to the terminal with a computer for download and upload of user information and transaction logs. In the terminal, the USB Flash Disk function is known as Pen Drive Management.

### Type of USB

There are various types of USB available in the market. The terminal can only work with USB flash disks that support minimum Linux Kernel 2.4.x, working fine with Imation, Transcend and Pen Drive (minimum support Linux Kernel 2.4.x) To determine the type of USB compatible by FingerTec terminal, please refer to this link [fingertec.com/news-letter/HL\\_74.html](http://fingertec.com/news-letter/HL_74.html)

### Downloading Attendance Logs

**To download attendance logs from the terminal to the computer:** Press Menu > Pen-Drive Mng > DwnLoad AttLog > The terminal would require you to plug in the USB Flash Disk to proceed. After the download process is complete, eject USB Flash Disk from the terminal and connect it to your PC that has been installed with the software. Upload the data from the USB into software for further processing.

### Downloading User Data

Enrollment of user must be done at the terminal. During enrollment, user data such as name and user ID are entered. **To sync the data between the terminal and computer:** Press Menu > PenDrive Mng > DwnLoad User > The terminal would require you to plug in the USB Flash Disk to proceed.

### Uploading User Data from USB to Terminal

While administrator can input user data from the terminal, the rest of the users information is completed in the software. Get the latest updates of user information from the software to the terminal by using a USB Flash Disk. Press Menu > PenDrive Mng > Upload User > The terminal would require you to plug in the USB Flash Disk to proceed.

### Uploading Short Messages

Some terminals can display a short messaging system on the LCD. The SMS can be private or public. **To assign sms to an individual or all staff using USB:** Press Menu > PenDrive Mng > Upload SMS > Insert the USB Flash Disk to proceed

## 8 • ACCESS

### Using The Terminal as Door Access

The terminals can be connected to door access accessories like electromagnetic lock, doorbolt, exit button, etc to control access to doors. FingerTec provides all kinds of door-lock accessories which can be viewed at [accessory.fingertec.com](http://accessory.fingertec.com).

Make sure you understand the access options offered in the terminal and do necessary configurations for your door access system.

### Access Options

This function determines user's accessibility or authority to enter certain doors.

#### TIME ZONE

The period where a user is allowed access is called TIME ZONE or time period (TP). In total there are 50 time zones available in FingerTec models. Each Time Zone has 7 time slots for Monday until Sunday. **To define time zone:** Press Menu > Options > Access Options > Define TP > Select the Time Zone number and determine the time for each day.

#### Example 1

TIME ZONE	SUN	MON	TUE	WED	THU	FRI	SAT
1	0900:1800	0900:1800	0900:1800	0900:1800	0900:1800	0900:1800	0900:1800

#### What does Time Zone 1 mean?

Time Zone 1 consists of a constant access time for a period of one week where a user checks in at 9:00 and leaves at 18:00

#### Example 2

TIME ZONE	SUN	MON	TUE	WED	THU	FRI	SAT
2	0000:2359	0800:1200	0800:1200	0800:1200	0800:1200	0800:1200	0000:2359

#### What does Time Zone 2 mean?

Time Zone 2 is showing a variation in access schedule which is from 8am-12pm from Mondays to Fridays and users are not allowed any access on the weekends.

#### Example 1

TIME ZONE	SUN	MON	TUE	WED	THU	FRI	SAT
2	0000:2359	1400:1800	1400:1800	1400:1800	1400:1800	1400:1800	0000:2359

#### What does Time Zone 3 mean?

Time Zone 3 is showing a variation in access schedule which is from 2pm-6pm from Mondays to Fridays and users are not allowed any access on the weekends

## GROUPING

When a group of users are having an almost similar time zone assignment, they can be grouped together. **For example**, Time Zone 2 and Time Zone 3 are suitable for one group where users in this group checks in at 8:00 until 12:00 has a, break time from 12:00 to 14:00 , continue from 14:00 to 18:00, and no one is allowed access during weekends. Therefore, these users will be in Group Time Zone 1. The table below illustrates the Group Time Zone concept.

GROUP TIME ZONE	TIME ZONE	TIME ZONE	TIME ZONE
1	2	3	

There are a total of 5 Group Time Zones available in the system. The system default is Group 1 and Time Zone 1. Therefore, the newly enrolled users automatically will be in an unlocking status. If those users are not included in the grouping combination setting, they are given permission to record attendance but they can't unlock any door.

**To define Group Time Zone:** Press Menu > Options > Access Options > GRP TP Define > There are a total of 5 Group Time Zone offered and each Group Time Zone accepts only 3 time zones.

## User Account Options

After a user has been enrolled, you can configure his/her access option settings. Press Menu > Options > Access Options > User Acc Opts > Input the user ID that you want to set the access option for > Determine the below matter:

USER ACC OPTS	WHAT YOU SHOULD DO
Belong to Group	Select group for this user
Use Group TPs	Yes or No
TP1	Select your Time Zone number 1
TP2	Select your Time Zone number 2
TP3	Select your Time Zone number 3
VERType	Select the verification type. There are a total of 15 types available
Use Grp VS	Yes or No

## Access Combination

Access Combination is when you combine different users' verification in order to gain access. The system offers 10 different Access Combos and each combination applies to 3 Group Time Zones:

ACCESS COMBO	GROUP TIME ZONE	
1	1	TP1: 0900 – 13:00
	2	TP2: 1000 – 1500
	3	TP3: 1300 - 1400

To use the Access Combo, users from all the three time zones must be present for verification and the time period of the three groups must be valid in order to gain access. As shown in these time zones, 13:00 is the overlapping time where all of them can gain access.

**To configure Access Combo:** press Menu > Options > Access Options > Access Comb > Select the combination you want for example Comb1 > OK > input the number, in this case 123 to represent GRP TP1, GRP TP2, GRP TP3 > OK

## Lock

The opening period of the electromagnetic lock or door bolt can be controlled according to your requirement or preference. The default value is 150 which translates to 3 sec. 50 is equivalent to 1 second. Press Menu > Options > Access Options > Lock > Determine the value of lock delay.

## Door Sensor Delay

Door sensor delay can be configured to alert users if a door is not closing well after a time period. A door sensor must be installed prior to activation of this option. The default period is 10seconds and the maximum period is 999seconds. Press Menu > Options > Access Options > Dsen Delay > Determine the value of lock delay.

## Door Sensor Mode

Door sensor mode is to configure the time to alert an internal buzzer if the door is not closing properly. The standard of door locking system includes:

**Normally Closed (NC):** An electrical contact that regularly allows electricity to flow until it is signaled to open

**Normally Open (NO):** An electrical contact that rarely allows electricity to flow. To use door sensor, select NC. Press Menu > Options > Access Options > Dsen Mode > Determine the type correctly > OK

## Door Sensor Alarm

Door Sensor Alarm can be configured to alert users by using the alarm system if a door is not closing well after a time period. An alarm system must be installed first to use this operation. Press Menu > Options > Access Options > Dsen Alarm > Determine the period > OK

## Turning Off Alarm

There are scenarios that require you to turn off your alarm system and this can be done through the terminal. To do this you have to press and hold the security button at the back of the reader followed by pressing Menu > Turn Off Alarm. If you didn't press the security button, the message "System Broken!!!" message will be displayed when you press the Turn Off Alarm operation button.

# Duress Options

The terminal will trigger an alarm system after receiving a successful verification from a duress password.

## HELP KEY

You can configure a Help Key in your terminal to function during duress situations. First, you have to enable the Help Key by: Press Menu > Options > Access Options > Duress Options > Help Key > Y. Press and hold the up arrow for 5s to trigger alarm.

## PASSWORD TRIGGER

You can also set password to trigger the alarm. To enable this option, press Menu > Options > Access Options > Password Trigger > Y. Alarm will trigger if any password is entered.

## TRIGGER METHODS

The terminals offer 3 types of alarm trigger method. Press Menu > Options > Access Options > Duress Options > Choose your method > Y. You can choose one method only.

ALARM TRIGGER METHOD	WHAT DOES IT MEAN?
Password Trigger	Triggering alarm using password method
Help Key Trigger	Triggering alarm using help key method

### NOTE

Do not use the same method during normal working days to avoid triggering the alarm system and disrupting working environment.

## ALARM DELAY

Set the timer to set off the alarm after successful duress password. The time range is from 0 to 254s. The type of output for alarm is NO/NC. Press Menu > Options > Access Options > Duress Options > Alarm Delay > Set your value > OK

## Alarm Count

There is a limit to unsuccessful verification by a user. Predefine the value of unsuccessful verifications so if a user exceeds the allowed times, the alarm will be triggered if your terminal is installed with an alarm system. Press Menu > Options > Access Options > Alarm CNT > Define the value > OK

## Group Verification Type

This function offers various verification type(s) for every group that can be set according to time. Description of verification types available in FingerTec fingerprint terminal is explained in Chapter 4: User. Press Menu > Options > Access Options > Group VerType > Select the Group > OK > Select the time > Down arrow and select Verification Type. After finished, press OK.

## 9 • RFID CARD FUNCTION

The terminals are versatile and it can accept card verifications. This chapter covers the Radio Frequency Identification or better known as RFID system. The terminals accept RFID card with specifications of 64-bit, 125kHz.

### Enrollment of RFID Card

RFID can be enrolled alone or with password. Each RFID card comes with a unique ID and the terminals will read from the numbers and match it with the card.

Enrollment of RFID is easy. Press Menu > User Manage > Enroll User/Admin > Reg RFID > OK > Do you want to do new enrollment? > OK > Insert the user ID > OK > Wave the card to the induction area and the machine will display the card number on the LCD along with the User ID > OK > The terminal will display User ID-C meaning that the ID is enrolled with card > OK(Save)

### Verification Using RFID Card Only

In case you want the terminal to read only RFID card, you can configure this selection by selecting RF on Group VerType under Access Options.

### Multi-verification Methods Using RFID

The terminals allow multi-verification where a user is required to use two or more verification methods before he is allowed access to certain areas. Refer to **Chapter 4: User**, page 19 under **Types of Verification Method** for more information about different combinations for the terminals and how to configure them.

Basically, in order to select different verification methods, make sure that you have registered or enrolled that method in the terminal for the said User ID before any selection is made.

### Deleting RFID Card

RFID cards can be used again and again but the information in the card must be deleted first before inserting new information.

Press Menu > User Manage > Delete > Input the User ID and wave the card at the induction area > The LCD will ask whether you want to delete the User ID-C > The terminal will ask whether you want to delete User ID > And to delete user. Press OK to all.

Once the card has been emptied, it can be used again.

### Changing Card ID

Press Menu > User Manage > Enroll User/Admin > Reg RFID > ESC > Change Card ID > Key in Original ID > OK > Wave new card > OK (Save)

## 10 • HID CARD FUNCTION

The terminals accept HID cards with specifications of 1325, 26-bit, 125kHz. The Prox II cards support 26-bit and it comes with unique programming information into its contents, which include card reading bits, card number range, facility code, site code, etc. HID cards also applies encryption to the contents of the card to maintain high level of security and to eliminate duplications.

### Registering HID Card

Registration of the HID card is similar to registration of normal RFID cards. Press Menu > User Manage > Enroll User/Admin > Reg RFID > Do you want to do new enrollment? > Insert user ID > Wave the card to the induction area and the machine will display the card number along with the user ID on the LCD > The terminal will display UserID-C indicating that the user ID has been enrolled with card > OK(Save)

### Deleting HID Card

HID cards can be used again and again but the information in the card must be deleted first before inserting new information.

Press Menu > User Manage > Delete > Input the User ID and wave the card at the induction area > The LCD will ask whether you want to delete the User ID-C > The terminal will ask whether you want to delete User ID > And to delete user. Press OK to all.

Once the card has been emptied, it can be used again.

### Who should do the Auto Test?

Auto Test page is to diagnose or analyze the conditions in the terminal. There are 6 tests available in the Auto Test page and only the administrator is allowed to perform the test. Before running any tests, kindly contact your reseller for advice or you could email [support@fingertec.com](mailto:support@fingertec.com).

### Run All Tests At Once

The Auto Test contains 6 tests and to run all of them at once, Press Menu > Options > Auto Test > Run All Test > OK > "Pls keep Pwr On" message will be displayed > The terminal will run all tests and when finished the LCD will display the result such as this: All: 31 Bad: 0, to indicate the level of breakdown in the terminal.

### FLASH Test

Press Menu > Options > Auto Test > FLASH test > OK > "Pls keep Pwr On" message will be displayed > The terminal will run all tests and when finished the LCD will display the result such as this: All: 31 Bad: 0

### LCD Test

Press Menu > Options > Auto Test > LCD test > OK > The screen will display lines of 'W'. Any missing Ws or jagged W indicates LCD error. Escape to return to the previous page

### Voice Test

Press Menu > Options > Auto Test > Voice test > OK > The LCD will display for example: "Play Voice 1" and you will hear the message for that. Press OK to listen to the next voice. Any error indicates that something is wrong with the speaker.

### Key Test

Press Menu > Options > Auto Test > Key Test > OK > Press any key and look at the LCD display. If the key matches the description on the LCD, the keypad is in good condition

### RTC Test

Press Menu > Options > Auto Test > RTC test > OK > If the RTC battery is still working, the test will prompt an "OK!"

## TROUBLESHOOTING

### “Unable to Connect” Appears

When this message appears, it means that the settings for the terminals and the computers are not properly done. Find out which method you are using to connect. FingerTec offers LAN, RS232, RS485 and USB communication methods. Refer to Chapter 3: Connection - Syncing Terminal to further understand the topic.

### “Admin Affirm” Appears

You are not an administrator of this terminal. Only an authorized administrator of the system is allowed to access the Menu. Any attempt of normal user to access the Menu will prompt “Admin Affirm” message on the screen. In case the administrator has resigned from the company, kindly contact your FingerTec authorized reseller to access the terminal.

### The LED is Blinking All The Time

You have nothing to worry about unless the blinking light is red. The green light indicates that terminal is on standby mode. Red blinking light may signal a problem in the terminal. Charge your terminals for a few hours to avoid the red light from blinking. Consult your reseller for technical advice.

### RFID Card Doesn't Respond

Two possibilities for this problem

**Have you registered the card to the terminal?**

The card must be registered to the terminal before the terminal could read the information in the card. Refer to chapter 8 User, page 29 for card enrollment.

**Have you assigned the user ID to the verification group that supports RFID card?**

Without setting the terminal that you are under a group that supports RFID card, the FingerTec terminal wouldn't read your card.

### No Sound

A few things could cause this problem:

**The terminal voice mode is silent**

Perhaps someone has turned off the voice in your terminal or reduced its volume to 0%. Refer to Chapter 5 System to under Voice to rectify.

**Speaker is damaged**

Once you have rectified the voice mode and the problem persists, proceed to test the voice. Go to Chapter 12 Auto Test to do the test. If no voice emitted, contact your local reseller for support.
