

FingerTec AC900 Mastering Access Security

The AC900 is a Access Control and Time Attendance machine which never fails to deliver its purpose as a security system. With the AC900, you won't have to worry about the misusing of keys or key cards as access is controlled through a person's fingerprint. The AC900 is a user-friendly, reliable, and flexible fingerprint authentication system which is integrateable with other third party security systems to ensure a high level of protection for your premises.

Precise Recognition

The AC900 uses the minutiae matching technology which ensures only enrolled users to enter a restricted.

User-Friendly

Any more user-friendly, and the AC900 will have to speak to you. The AC900 has a simple to use user interface and keypad.

Fast Paced & Versatile

The AC900 gives you an option of identity verification through finger print scanning or password. On top of that, fingerprint verification is done within a second!

Eliminates Buddy Punching

Prevent the dishonest act of buddy punching by switching from punch card to fingerprint attendance verification.

Work Codes

Let your staff experience ease of movement allowing them to simply key in a preset code to inform the management of their movement.

Easy Data Management

Our bundled software, the TCMS V2, enables easy data handling and access control management.

Integrateable System

Have a different existing system in your organization? No problem, the AC900's user data can be exported to several formats for you to integrate with your current system.

Value for Money

The AC900 represents all the basic functions and roles of an access control and time attendance systems. Pay for just what you need.
