

FingerTec CloudTrack Application Form

CloudTrack is FingerTec's latest integrated innovative system, allowing its resellers to track, note, and update information of each and every terminal purchased by our resellers. With CloudTrack, resellers can track the warranty status of their terminals, the shipment and past purchase tracking, record down updates and upgrades done to their terminal, and much more, thus giving a FingerTec terminal its very own lifeline.

Every reseller is entitled to a CloudTrack account. To apply, kindly fill in the details below. One (1) company is entitled to two (2) CloudTrack login accounts. Once completed, scan and send the form back to info@fingertec.com to proceed.
