Secure Single Sign On with FingerTec OFIS GATEWAY

OFIS Gateway is an innovative program for fingerprint integration into a PC, brought to you by FingerTec. A bundled program with the OFIS-X or OFIS-Y scanner, password management for your PC becomes safer and convenient, by using the secure fingerprint technology authentication method to replace the regular alpha-numeric passwords. Gain quicker access to your online accounts via the Web Accounts setting, and use fingerprint authentication in place of the usual username and password. And with the extensive features in the program, you can also utilize fingerprint for other matters in your PC such as file encryption, screensaver locks, and much more.

Secure Web Account Login
Configure your online accounts in the OFIS Gateway, and never have to use your password again. A simple scan of your finger will suffice.

File & Folder Encryption
Classified and highly confidential files can now be secured tightly with the file encryption and decryption feature in the OFIS Gateway. Only you can access files which have been secured with your fingerprint.

Screensaver Resume Security
Similar to your password protection that comes on after resuming from a screen saver, OFIS Gateway allows you to configure this login to use fingerprint instead of password as a login.

OFIS Scanner Disconnection Safety
As a safety feature, if anyone tries to disconnect the OFIS scanner to decipher your password instead, your PC can be set to go into a locked-mode, requiring fingerprint verification before continuing.

Windows Compatible
The OFIS Gateway is compatible with most PCs, as it supports Microsoft Windows 2000, XP, Vista (32-bit), and Windows 7 (32/64-bit) which has Intel Pentium III 450MHz or above.

User-Friendly Management
With the OFIS Gateway Operation Panel, managing and configuring the OFIS Gateway can all be simply done from one window.
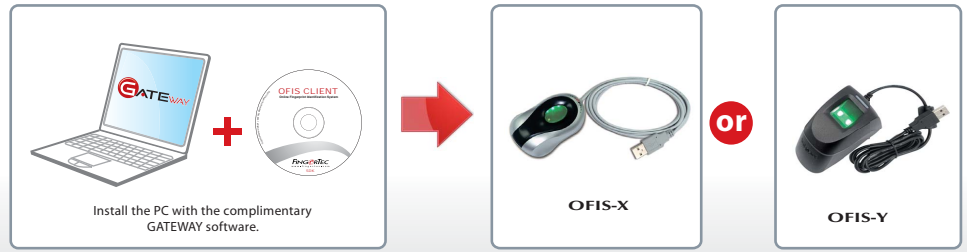

Bundled Software
OFIS Gateway is a complimentary software offered by FingerTec, bundled together with the OFIS-X and OFIS-Y scanners. So fingerprint integration is not only easy, it's free!

24-hour Technical Support
With FingerTec's Technical Support Team, you won't have to worry about any difficulties in configuration or management as our team is always there to help you via live chat, email, or TeamViewer.

KEY FEATURES

### Fingerprint Enrollment

Enrolling fingerprints is easy with the OFIS Gateway on-screen step-by-step instructions, accompanied with a display of the fingerprint image to guide users for a better verification.
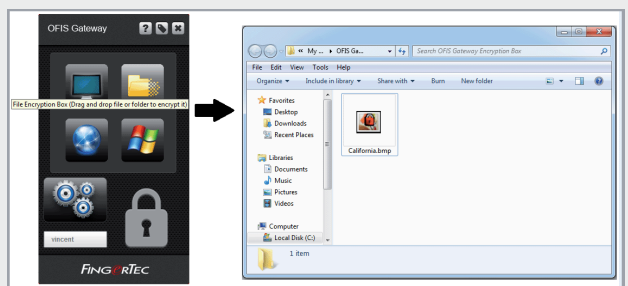

Web Account Property

Web Account Setting allows you to configure your web accounts, such as emails, online shopping accounts, and other accounts that require a username and password, to use a fingerprint as a password instead. You can view your web accounts, add web accounts, maintain your web accounts, and export/import your web account data from here.

Windows Logon

With the OFIS Gateway installed, you have the option to log into Windows with the aid of an OFIS-X or OFIS-Y scanner, using either fingerprint or password.

File Encryption

The OFIS Gateway program not only protects your login accounts with fingerprint, but also lets you encrypt your selected files with fingerprint verification. This is useful especially for confidential documents in the computer.

MINIMUM COMPUTER REQUIREMENTS

• IBM compatible PC
• Pentium III 450 MHz or above
• 64MB RAM
• 5MB for client module installation
• Standard mouse and keyboard
• 1 x USB port
• Microsoft Windows 2000, XP, Vista (32-bit), Windows 7 (32/64-bit) and Windows 8 (64-bit)
