

Transparent Anti-Torn UHF RFID sticker

Automate Access Safely & Stealthily

More often than not, residents would face these problems when their vehicles enter or leave a neighborhood's enclave using access card. The gate never opens even though you have waved your access card repeatedly from the inside of your car because the distance between the card and the reader is too far to be readable. You place your card in a holder that is attached to a windscreen but more than often the card drops making it difficult for you to retrieve it. Worse, the top-notched quality tinted-glass of your car blocks the RFID signal from reading the card, requiring you to wind down the window to gain access or exit to your neighbourhood, everytime!

It's time to end all of those frustrations with the transparent anti-torn UHF long range RFID sticker. Simply stick it on the inside or outside of your car's windscreen for the reader to automatically reads your vehicle's information hassle free. The sticker is designed weatherproof and its transparency nature made it inconspicuous to the public. The sticker is also embedded with anti-torn safety feature, making it damaged and unusable if someone tries to peel it off from your vehicle and paste it for dubious activities.

Get the UHF RFID Sticker for a perfect hands-free auto-access and secure system for your vehicle and manage the ins and outs of your enclave without any hassle.
