Yes, it's me!

Face ID 2, the machine that confirms your identity at a glance.

Three Modes, One Machine

Face ID 2 is the latest biometrics product from FingerTec Worldwide that combines face recognition technology, fingerprint technology and card technology in one sophisticated machine. It is loaded with a powerful microprocessor to collect precise data for time attendance and door access for premises and offices.

Why should you choose Face ID 2?

You have options

FingerTec Face ID 2 allows you to have verification options you prefer. You can choose between face, fingerprint and card verification method based on your preference and requirements. Registration and shifting of verification modes can be done without much hassle, which makes Face ID 2 versatile for everyday office use.

Experience The Latest Technology

Get to experience the wonder of the latest biometrics technology through Face ID 2. The machine takes 5 images to obtain a 3D template of your face image. After enrolment, verification can be done at a glance and even in the dark. It is contactless and hassle free, and it provides precise data for attendance and door access activities.

Powerful software included

Face ID 2 comes with powerful time management software that has been used by millions around the world, TCMS V2.

Versatile System

Face ID 2 can be linked to other FingerTec models for a more versatile system.

Face ID Features
