We Simplify

8 exclusive accessories.
Brought to you by FingerTec.

Demo Kit
Install a FingerTec® terminal to a demo kit to simulate door access using FingerTec® fingerprint product.

Flexi-Kit
Display your FingerTec® terminal easily with FingerTec® Flexi-Kit. Foldable and simple to install, flexi-kit is the perfect choice either to display the terminal in the office, during demonstration session or for exhibition.

AdapTec
Installation is made simple with AdapTec, a controller and power supply complete in one package with readily available connection points for easy plug-in and usage.

Exit Button
Just wave your hand at the button to open the door. Slim, sleek and sophisticated, FingerTec® exit button is easy to install and easy to use.

Metal Casing
Promote neatness in installation with the use of metal casing to contain AdapTec and backup battery in one box. Shipped in foldable DIY concept, it's exclusive from FingerTec®.

Enclosure
Protect your FingerTec® terminal from 'naughty' hands with custom made lockable enclosure, disallowing unauthorized personnel from meddling with the keypads and the terminal.

Mini UPS
Want to take your FingerTec® terminals to the site or you want to place the terminal far from the power supply point? No worry. FingerTec® terminal can go mobile with mini UPS. We offer 2 types of mini UPS, 5V for black and white LCD time attendance units and 12V for door access and color screen models. Last for 3-4 hours, mini UPS is great way to supply back up power to your FingerTec® terminals without much hassle.

PoE (Power over Ethernet)
To transfer electric and data simultaneously using one single device, FingerTec® provides Power over Ethernet without having to modify the existing Ethernet cabling infrastructure. Connect to a server hub on one side and a FingerTec® terminal at the other end.

FINGERTEC®
