Improve Punctuality and Reduce Absenteeism In Your Office With FingerTec Attendance Products

Is Attendance or the Lack of It is A Serious Issue In Your Company?

You might be one of many company owners, human resource managers, admin managers or IT managers who are looking for the simplest solution to solve your staff's attendance problem. The problem stems from lack of surveillance and control. Without careful surveillance, control is weakened and absenteeism steals your company's productivity subtly without you even noticing it.

The Importance of Accurate and Reliable Data

Many organizations have been using computer systems to supervise staff's attendance with objectives to reduce workload of human resource department, to save time and operation cost and to process payroll faster. However, what's the good of the surveillance if the data is inaccurate. When the identity of a person can't be truthfully confirmed, the problem persists! Nobody wants GIGO!! Garbage In Garbage Out is the computer science term referring to results of data processing that is directly related to the quality of data. Inaccurate data will produce inaccurate results. It's not worth spending vast amount of money for an ineffective system.

Biometrics and Time Attendance System

The only solution to overcome attendance problem is biometrics system. Biometrics system is identity verification technology using human body parts, and the most popular and viable verification system is fingerprint system due its practicality and ease of use. Biometrics system does not require additional cost for every worker who is using the system because all you need is a fingerprint. No cheating of attendance with biometrics time attendance products.

Stories of Biometrics System Failure

- **The Biometrics Attendance Product is Complicated and Hard to Use**
  Enrolment of users is complicated and requires a lot of tedious process for enrolment of one user.

- **Difficult Verification Causing Long Que Everyday**
  Verification is difficult because of the flaws in matching algorithm leaving many staff struggling to get their fingers verified.

- **More Attention Given to Access Control than Time Attendance**
  Features and benefits on hardware and software are more focused on Access control making implementation of time attendance handicapped.

- **Lack of Warranty Period**
  Suppliers refuse to provide a considerable warranty period due to various reasons including lack of confidence in product quality.

- **Resellers Having Lack of Experience in Time Attendance Implementation**
  All they (resellers) concern about is money and technical expertise in the area is not their priority leaving customers with a lot of unanswered questions and tasks.

What Makes FingerTec Different?

Introducing FingerTec Time Attendance System, the most popular fingerprint time attendance system since the year 2000. FingerTec has a vast range of time attendance system that suits to your company's requirements, from the simplest desktop version TA300 to TA103R, time attendance with fingerprint and cards, to web-based fingerprint system OFIS TA. The time attendance products of FingerTec have been deployed in Malaysia and the rest of the world having thousands of satisfied customers the world over.

FING@RTEC.

Why You Should Consider FingerTec?

- **FingerTec has The Best Algorithm in the Industry**
  While others resort to only thumbprint and only placement of finger at a certain angle, FingerTec accepts all fingerprints and you can place your finger at any angle during enrolment and registration. During enrollment, place your finger three times on the scanner and you are good to go. Once you have enrolled, you don't need to enroll again for other machines.

- **Less than 2 seconds verification, what more can you ask for?**
  Verification at FingerTec products take less than 2 seconds and it's accurate as ever. Place your finger and your attendance is verified successfully.
