

# 2008 In Review

Shoot for the moon. Even if you miss, you'll land among the stars. Les Brown was quoted. In the beginning of the year we aimed for the moon and come December, we couldn't be happier knowing that we have landed on the moon. And to quote Les Brown one more time, help others achieve their dreams and you will achieve yours. FingerTec® business is indeed a business about helping people creating good biometrics business around the world, and we take pleasure in doing that. As we are looking forward to the prospects in 2009, we want to recap 2008 in snapshots.

## January

FingerTec® once again showcased in Intersec, Dubai. President Bush visit to the city and heavy flood reduced the number of visitors significantly but international visitors couldn't afford to miss one of the biggest security show in the Middle East.

FRIS II, Fingerprint Remote Identification Server version II was introduced to cater users who require high template capacity to store all data in a centralized server.

## February

The stylish R2 was launched to the market satisfying the needs for door access requirements.

## March

Timeline 100, card product for time attendance, is a product diversification from FingerTec®.

## April

Kadex is an RFID card reader for door access control system.
