The Director of the United States Patent and Trademark Office

Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this

United States Patent

Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America, and if the invention is a process, of the right to exclude others from using, offering for sale or selling throughout the United States of America, or importing into the United States of America, products made by that process, for the term set forth in 35 U.S.C. 154(a)(2) or (c)(1), subject to the payment of maintenance fees as provided by 35 U.S.C. 41(b). See the Maintenance Fee Notice on the inside of the cover.

ABSTRACT
A system for collecting and transferring electronic information includes one or more servers, having one or more centralized databases for storing or retrieving the data, connected to a network, one or more computing devices connected to the servers via the network for retrieving the data from the centralized databases, and a plurality of biometric devices connected to the servers via the network, located at different locations. Each biometric device comprises a system for identifying users based on biometric data of the users, a system for storing the biometric data and activity information of the users, and a system for sending the biometric data and activity information to the servers in communication with the servers in real time via the network.
