QA & NOTES

(1) Q: Prompts up "Camera offline" or "Fail to download video" after connection

A: Make sure the WIFI/router could visit internet; make sure the WIFI was not changed, if changed, please long press the RESET key 5s, until voice prompt "Factory reset success ", then it will reboot and follow voice prompt to do setting again.

(2) Q: Squeal comes during intercom

A: The squeal is caused by too close distance between camera and phone, please keep proper distance.

(3) Q: Camera is offline

A: Make sure the WIFI/router is available; mobile already logined the WIFI that the camera should connect to; enter correct WIFI information; are there too much devices connect to that WIFI.

(4) Q: Fail to login APP or download video

A: Make sure your phone could visit internet and with high speed, also make sure "i-TimeTec" APP is not forbidden to internet.
