Color your identity
with the i-Kiosk 100

With its stunning looks and strong features, the FingerTec i-Kiosk 100 has everything that you need! The i-Kiosk 100 works effectively as a stand-alone unit and performs excellently in a networking environment. The colour screen and futuristic design blends in with your modern workplace décor. The user-friendliness, security features, and data transfer features will ensure that this is a device that'll never let you down. So, looking for an all-in-one door access security solution? The i-Kiosk 100 is now at your command.

Increase Your Brand Awareness!

Display a welcoming message or even a trademark logo in a form of a picture(s) on the i-Kiosk 100. We give you branding opportunities at no cost!

Shortcut Keys

Get to where you need instantly with the 8 programmable shortcut keys on the i-Kiosk 100.

Eliminate Buddy Punching

Stop unnecessary disciplinary problems with this biometric device. Now, your staff's punch card is their fingerprint - no more cases of switcheroo.

Colour Your Mind

Treat your eyes to the amazing full colour TFT screen of the i-Kiosk 100.

Ease is the Word

With a T9 typing input method and a USB flashdisk port for data transfer, the i-Kiosk 100 could not be any easier for you.

We Offer Variety

Although we do recommend fingerprint verification to eliminate buddy punching, the i-Kiosk 100 also has card and password verification options.

Supersized Capacity

Our new improved firmware means that you get a capacity of 12,000 fingerprint templates with your terminal which can store up to 200,000 transaction logs.

Be Warned!

Get even tighter security! With the i-Kiosk 100, you can connect your terminal to an external alarm system to warn against break ins and emergencies.
