

Going Above and Beyond with The i-Kiosk 100 Plus

The i-Kiosk 100 Plus goes above and beyond the call of duty by not only functioning as a door access and attendance device, but also as a medium of communication to those around it. It's full colour touch screen display which is mainly used for configuration, can also be used for displaying short messages, videos, and music for the purpose of company branding and advertising. Integrated with the device is also a high quality lens that captures the a photo of the user during verification, whether successful or not. In addition with a USB flashdisk connection, this device also provides the option of syncing data through a Wi-Fi connection. Complete with the availability of short cut key functions, this model of biometric device proves to be user-friendly, customer-friendly and a value for money.

Display Your Company Motto!

The i-Kiosk 100 Plus has the option for you to display a message whether it be a welcome message or a company motto. Market your product or service for free!

Wireless Data Management

That's right. With the USB flashdisk port and the Wi-Fi data communication, syncing of data can now be done without any wiring hassle.

Camera

Don't compromise on security! Every time a user attempts to verify into an authorized area, this hi-tech camera captures a photo of the user. This feature is useful in warding off vandals, and in duress situations.

T9 Input Method

Reduce your time and effort by using the T9 method of typing when doing data input. With T9 Input, you just need to press a button once for the alphabet that you want.

Mini TV

Take your full colour touch screen display to the next level. Display a company ad, corporate song, or even a short entertaining clip for your customers/guests to view in your waiting room.

Shortcut Keys

This model of FingerTec's biometric device is among the few to have configurable shortcut keys. Arrive at the function you desire in 1 touch with these 8 shortcut keys!

Large Capacity

Don't worry about frequent data downloads from the device, for the i-Kiosk 100 Plus has the capacity to hold 12,000 fingerprint templates, and 200,000 transaction logs.

Multi Verification Methods

Is your fingerprint damaged due to injuries? We think ahead. Our device has password and RFID card verification to fall back on should your fingerprint fail to be read.
