

# Exploring the boundaries with Keylock 8800

The Keylock 8800 is a simple access control and time attendance device, with a mechanical door lock design. The device was designed to be placed on a door of a restricted area, as it has a stainless steel bar latch that functions as a door knob while making it suitable as an access control tool. The beauty of the Keylock 8800 is its simplicity. From installation to administration, the Keylock 8800 is wire-free and hassle-free. User management can be done easily at the terminal itself. The Keylock 8800 manages to stay wireless due to its battery operated power source, and its USB flash disk feature. To sum it up, the Keylock 8800 is a small, user-friendly and boundary-less product which, despite its size, contains the features that you need in an access control and time attendance device. Because at FingerTec, we make things easy!

## Simple outlook

The Keylock 8800 was designed with simplicity in mind. Its user friendliness is derived from its combination of a small LCD display, and a total of only 5 simple buttons.

## Minimal Space Usage

The Keylock 8800 installation is done on the door itself. There is no more need to lose precious time contemplating about wall space or positioning.

## Simple USB data transfer

All you need is a USB flash disk to transfer transaction logs from the Keylock 8800 to your computer. It is that easy!

## Visitor-friendly

Expecting unregistered guests? The Keylock 8800 has just the thing: a visitor mode that allows free access of the secured area at a when activated.

## Multi-Verification Methods

Small as it may be, the Keylock 8800 is still able to accept all three fingerprint, password, and RFID card verifications (or a combination of the above), proving that size doesn't actually matter.

## Improved Sensor Technology

The Keylock 8800 has a new improved fingerprint matching technology that verifies fingerprints in less than 1 second.

## No Wiring, No worrying!

The power for the Keylock 8800 is supplied using 4 AA alkaline batteries which can last for 5000 unlockings, with a battery life indicator located on the top left of the LCD screen. No more hassle of wiring!

## Simple Terminal Management

Addition, deletion and amendment of users can be easily done at the Keylock 8800 terminal itself using an administrator card. These processes are also made easy with indicators on the LCD screen.
