Making Door Access Simple With m-Kadex

m-Kadex is a simple card system reader for time attendance and door access control, designed without any keypads or LCD on the surface. The main function is to read cards for attendance and access control. You can only perform enrolment and deletion of new cards at the reader if you have the administrator card. Absence of the administrator card would not allow any operations to be carried out at the m-Kadex terminal. The management of the terminals has to be carried out from the software. Get your m-Kadex from us now!

Small, Yet Loaded
m-Kadex stores up to 30000 cards and 50000 logs, more than sufficient for any small medium businesses.

Simple Administrator Management & Enrollment
Register an administrator card and registrations of users are made easy. To enroll, touch the administrator card on the m-kadex followed by a user card, and enrollment is done! It is as easy as it gets.

Powerful Square
m-Kadex has all access control functions required for a solid system, link it to the powerful TCMS V2, it works wonders.

M+i Kadex Me!
m-kadex can be in combination with i-kadex for a more economical match. m-Kadex as entry and ikadex as exit, makes the perfect door access combination.

Simple Terminal, Saves Cost
Mix and match your FingerTec system with m-kadex to give you more value for your money. Choose Kadex for the main entrance, m-kadex for other entrances and ikadex for exits. Haven't you want options in life?

Simple Verification
Look at the light on the m-kadex for your status! Blue is on standby, green is verified and red is indicating errors or failure. Life should be more simple, don't you think?

Simple USB data management
One step is all you need. Plug USB flash disk in the m-kadex and the transaction logs are downloaded into the USB flash disk. Plug the USB Flash disk in your computer with TCMS V2, it's that easy!

Attract Not, Repel Not
m-Kadex's design is very simple and without having any keypad or LCD, it's not attractive to potential vandals but the design is m-kadex is sleek enough for modern offices.
