Redefine Security
with FingerTec's R2 Series

FingerTec's R2 is our top selling terminal of 2010, and for a reason at that. The R2 is the ideal door access and time attendance system for those looking for an affordable security control with practicality. It contains all the features that you will need in a security system. The fact that the R2 can be paired with the R2i, a slave reader for the R2, to create a complete door access solution, is also a pull factor for this popular device. With the USB flashdisk mode of transferring data, the R2 proves easy not only easy to understand but also easy to use.

Precise Recognition
The R2 uses minutiae matching technology that ensures only enrolled users are granted access.

Transfer Data at a Flash
The R2 lets you transfer transaction logs and data by using a USB flashdisk. Simply plug and play!

Get Extra Security
With the R2, we provide you the option of connecting your terminal with an external alarm system that goes off during an unexpected event or emergency.

Complete Access Solution
Get the R2i slave exit reader to compliment your R2 access control terminal for a full door-in door-out solution!

Bundled Software
Manage your data fast and effectively via our in-house software, the TCMS V2.

Versatile
Whether you prefer to verify by fingerprint, card or password, the R2 accepts all three verification without compromise.

Display a Message
Personalize a short message for specific users, or display a general short message for branding purposes!

Workcodes
Let your staff experience more independence by reporting their whereabouts via our workcodes feature!
