Face ID5 FTD

Face & Palm Verification and Thermal Imaging Temperature Detection Terminal

Face ID5/FTD is the Premium Version of the Face ID5 model. This model highlights the visible light facial-recognition technology, and it comes with body temperature detection using thermal imaging engineering facial recognition algorithms and the latest computer vision technology. It supports both facial and palm verifications with large capacity and speedy recognition to improve security performance in all aspects. Face ID5/FTD is contactless, which eliminates the risk of cross-contamination; it can detect body temperature and verify masked individual accurately. It is equipped with the ultimate anti-spoofing algorithm for facial recognition against almost all types of fake photos and videos attack. Face ID5/FTD also can perform 3-in-1 palm recognition (palm shape, palm print and palm vein) in 0.35 sec per hand; and the palm data acquired will be compared with a maximum of 3,000 palm templates. Suitable to apply to any premises and public areas such as hospitals, factories, schools, commercial buildings, stations.

- Facial verification for masked individuals will increase the False Acceptance Rate.
- Therefore, a Palm verification for masked individuals is recommended as an added verification option.
- Temperature measurement data is for reference only, and it is not intended for medical use. Suitable for indoor environments without wind or direct sunlight.

Latest AI Face Recognition Technology

Embedded with the ultimate light-proof function technology to verify faces successfully even in a variety of light conditions.

Verify with Mask On

Verifies a face even with a mask on for better safety; the feature is optional yet crucial amid the pandemic.

A Safer Choice

Touch-less face verification technology provides greater convenience and better protection against cross-contamination.

Anti-Spoofing Checks

The technology has been improved with better security configuration to prevent crimes and spoofing attempts.

Large Capacity

Stores up to 6,000 face templates, 6,000 fingerprint templates, 3,000 palm templates and up to 200,000 transaction logs.

Speedy Verification

High-Speed Temperature Detection. 0.1s Temperature Detection & up to 120cm Measurement

Fever Detection

Configure temperature threshold for easy detection of high body temperature to exclude the potential risk of contagious disease transmission and deny access immediately.

Efficient Data Processing

Integrated with Ingress software, the bundled solution with door access and time attendance solution in one single system.

Temperature module sensor 12-month warranty
