FingerTec R2 is an access control and time attendance machine, designed to manage door access security at your office premise. This biometrics verification machine flexibly supports variety of identity authentication including fingerprint, card, password and their combinations before granting access to your restricted areas.

Sleek yet user-friendly, R2 does not only provide users with aesthetic value but it also offers them convenience with the hi-tech one-fingerprint-one-second verification speed. Having R2 system in place, it heightens the level of security and automates access activities data collection simultaneously. Each activity at the machines will be instantly recorded for monitoring and audit purpose, providing you with a safer environment and intact accurate records at all times.

FingerTec R2 comes with the powerful complementary software for door access and time attendance, Ingress, and its firmware is using Linux, which offers a more flexible operating system to customize features and it is more responsive in handling daily operations and data flow. Data portability in R2 has been made simple with several communication options available including TCP/IP, RS232, RS485 Cable, and USB.

#### Variety of Verification

R2 contains not only fingerprint verification, but also provide other commonly used methods including cards, passwords, and their combinations.

#### Precise Identity Verification

R2 uses minutiae point matching fingerprint technology, an advanced algorithm to match the stored fingerprint template with the live one to guarantee authenticity.

#### Complete Access Solution

Install the slave, R2c with R2 to achieve a more secure full biometrics system for your in/out entry/exit door access system to block all unauthorized entries and exits.

#### Data Management Simplified

FingerTec R2 is equipped with TCP/IP connectivity and when that is not available, a USB flash port can be used to transfer transaction logs into your computer.

#### Manage Remote Data Easily

With Ingress, manage the data of all your remote doors easily, determine the settings of your access control system and get the details of all the access activities from one central location.

#### Short Message Display

Communicate with your employee by personalizing a short message to be displayed at the terminal when they verify. The message can be directed to an individual or to a group of staff.

#### Built In Alarm

R2 allows installation of external alarm to your access system to alert you during emergencies and break-ins. Secure your premise with GroupTimeZone and Group Verify functions.

#### Workcodes

Let your employee experience independence by reporting their whereabouts via R2 workcode function. Select a workcode listed and scan a finger to verify.
