

SMOKE DETECTOR

DETECT SMOKE IN REAL-TIME

Smoke detectors are some of the most essential devices to have in a residence or office to ensure security and safety. While smoke detectors may not be the flashiest investment, they can make a difference between life and death.

Easy to install, this smoke detector is battery powered and will continue to operate during a power outage. It also synchronises with your smartphone. Away from home/office? A smart alarm will alert you (via your smartphone) when it senses a gas leak or smoke in your premises.
