Multiply Your Value with The **TA100C** GPRS

Fingerprint

GPRS

TCP/IP

RS232/RS485

USB

Move to the modern era of time attendance with the TA100C biometric device. With a systematic method of data collection, all your staff will have to do is scan their fingerprint and presto! - your attendance record for the day has been taken care of. The eye-catching full colour TFT screen enhances the hi-tech look of the machine, and compliments the overall look of any office environment.

GPRS Connectivity

Don't want the hassle of wires? Then opt for our GPRS enabled terminals instead. Connect to the PC TO sync data over a GPRS connection without having a range limit.

Workcodes

Let your staff experience more independence by reporting their whereabouts via our workcodes feature.

Eliminate Buddy Punching

The weakness with the clock-in card system is that 'buddy punching' can occur where one employee can clock in the time for another employee if any of them are late. Eliminate this occurrence by using the unique per-individual fingerprint as a clock-in card!

Short Message Display

Alert your staff by personalizing a short message to be displayed at the terminal when they verify.

Manage Your Data Easily

Administration is easy with the bundled software! FingerTec's TCMS software allows you to generate reports, monitor attendance and integrate FingerTec with a third party system

User-Friendly Icons

Complete with configuration icons, the interface in the TA100C couldn't be more user-friendly.

Full Colour Screen

This model comes with a full colour TFT screen. Display pictures corporate advertisements, screen savers and much more on the colour screen of the terminals.

Built-In Alarm

Increase the security at your workplace by installing an external alarm, and be alerted during unexpected scenarios such as break-ins and fire emergencies.
