

WATER LEAKING DETECTOR ELIMINATE THE RISK OF LEAK

Water leak or flood can wreak havoc with your finances. Physical damage caused by water devalues your property. Repair is costly and sometimes requires remodeling. Even if the situation is not grave, and you quickly drain the water, dry the floor, walls or furniture, the risk of mold growth is very high. Moist causes mold spores to multiply within only 24 hours after a leakage. They pollute the air and pose a threat to a human health. Sneezing, allergy and even asthma can be triggered by fungi. Mold is very hard to get rid of because its spores proliferate wherever there is dampness.

TimeTec Water Leaking Detector is a special electronic device that sets off an alarm when its sensor detects the presence of water. Place the water sensing cable in high-risk areas for leaks. This would be areas such as bathrooms, laundry rooms and kitchens, specifically for dishwashers, refrigerators, water heaters and sump pumps. By installing a water alarm that detects moisture as soon as it appears you prevent water damage that can empty your pocket and have a detrimental effect on your life.

Ready to use

Connect using Zigbee technology

High precision and high sensitivity

SPECIFICATIONS

MODEL	TT-WFD99
DIMENSION	60 x 30 x 12.5 mm (sensor) 28 x 26 x 12 mm (water detector)
WORKING POWER	DC3V (CR2450 battery)
STANDBY CURRENT	≤ 10μA
WORKING CURRENT	≤ 30mA
WORKING TEMPERATURE	-15°C ~ 60°C
WORKING HUMIDITY	≤95% RH
COMMUNICATION	ZigBee
COMMUNICATION FREQUENCY	2.4 GHz
COMMUNICATION DISTANCE	≤ 100m (open area)
